Ticket to Ride: Universal Score Sheet v2.4.0 by shigadeyo

TICKET TO RIDE: UNIVERSAL SCORE SHEET

Version: 2.4.0

Date: 4/24/2013

Updated By: [shigadeyo](#)

Overview

This score sheet will allow you to score multiples games of Ticket to Ride for up to five players for each game.

NOTE: Three score sheets fit well if printed in portrait and two fit well if printed in landscape; set print area first!

You can print out the spreadsheet and calculate the points manually or the spreadsheet will do it for you.

If you are printing out the sheet for manual entry, you may want to actually enter the players' names.

Not all score sheet fields may be applicable to the particular edition/expansion of Ticket to Ride being played.

This updated score sheet is based on the one previously created by **kjam4** that's available at:

Instructions

1. Enter the edition of *Ticket to Ride* being played at the top after **Ticket to Ride:**. Enter the **Date** in the upper right corner.
2. Enter the number of routes of a particular length for each player.
For example, if Player One has three routes that are four trains long, enter three in the column that has four train cars.
The spreadsheet will multiply three times the points you receive for a four train route (7) and put the total (28), in the **Score** column. Do this for all route lengths that the player has completed.
Ticket to Ride Map Collection (Volume 3): The Heart of Africa
Points (Pts) for routes may be double if Terrain Cards are used when claiming the route:
1-3 space routes require 1 Terrain Card for double points
4-6 space routes require 2 Terrains Card for double points
3. For each player, enter the **NET** destination ticket total:
+ Add points for the completed routes.
- Subtract points for the routes that the player did not complete.
± Any ticket that includes a City in Chaos (a city that contains Alvin or Dexter) is worth half of its normal point value, rounded down (e.g. A ticket worth 13 will be worth 6, if completed, or cost 6, if not completed).
4. For each player, enter the total points for merchandise tokens (from *Ticket to Ride: Märklin*).
5. For each player, enter any **Grand Tour of India bonuses** (from *Ticket to Ride Map Collection (Volume 2): India*):
Any Ticket whose 2 Destination Cities are linked via at least 2 distinct continuous paths of its owner's plastic trains qualifies for a Grand Tour bonus. These 2 paths may intersect, but cannot share trains. The size of a player's bonus varies depending on the number of his qualifying Tickets, as per the Mandala ("Circle" in Sanskrit) bonus table shown on the Map:
5 points for 1 qualifying Ticket.
10 points for 2 qualifying Tickets.
20 points for 3 qualifying Tickets.
30 points for 4 qualifying Tickets.
40 points for 5+ qualifying Ticket.
6. Enter any bonus points:
4 points per UNPLAYED train station (from *Ticket to Ride: Europe*).
10 points to the player* who has the **Longest Continuous Path** of routes:
"European Express Bonus" from *Ticket to Ride: Europe*
"Asian Express Bonus" from *Ticket to Ride Map Collection (Volume 1): Team Asia*
"Indian Express Bonus" from *Ticket to Ride Map Collection (Volume 2): India*
10 points to the player* who has completed the most **Destination Tickets**:
"Globetrotter Bonus" from *Ticket to Ride: USA 1910*
"Most Completed Tickets Bonus" from *Ticket to Ride: Märklin Edition*
"Globetrotter Bonus" from *Ticket to Ride: Nordic Countries*
"Globetrotter Bonus" from *Ticket to Ride Map Collection (Volume 1): Team Asia*
"Globetrotter Bonus" from *Ticket to Ride Map Collection (Volume 3): The Heart of Africa*
10 points to the player* who has connected the most **Cities**:
"Asian Explorer Bonus" from *Ticket to Ride Map Collection (Volume 1): Legendary Asia*
15 points to the player* who has collected the most **Alvin Monster Cards** (from the *Ticket to Ride: Alvin & Dexter* expansion).
15 points to the player* who has collected the most **Dexter Monster Cards** (from the *Ticket to Ride: Alvin & Dexter* expansion).
***NOTE: If several players are tied for a particular bonus, they each score the bonus.**
